### **DETAILED ACTION**

Claims 1-11 are pending in this application, which is a DIV of Serial Number 09/710626 now US Patent 6,617,248.

#### ***Specification***

The disclosure is objected to because of the following informalities listed below. Appropriate correction is required.

In the first sentence of the specification, an updated lineage of the present application should be provided.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 line 6, the phrase "smooth-surfaced" is deemed a relative term which renders the claim indefinite. The term "smooth" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. The same issue applies to claims 4 and 7.

***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

**Claims 1-11 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14 of U.S. Patent No. 6,617,248.**

Although the conflicting claims are not identical, they are not patentably distinct from each other because the elimination of forming a semiconductor device is an obvious variation.

Jin (6,479,100) discloses a method of forming a CVD ruthenium seed layer on a substrate by introducing a ruthenium-containing precursor and oxygen into a CVD apparatus and annealing the deposited seed layer in a gas ambient to form the ruthenium seed layer (col.2 lines 3-14) and is the most relevant art. Shiho et al. (6,875,518), and Agarwal et al. (6,596,583), and Lyons et al. (6,649,211) are cited as relevant art.
